The relative expense of maintaining a illage or hamlet numericality can be ascer-The relative expense of maintaining a village or hamlet numerically can be ascertained by reference to an examination of a small pamphlet prepared by John S. Conners, Esq. of North Bend, at the request of the interested parties. The nowers of Trustees of hamlets are compared with those of Conneils of villages. Hamlets have the power to appropriate property only for opening streets or alleys and construction of sewers and bridges (in the cases of appropriation or improvement) on the petition of the owners of two-thirds of the abutting property, and the concurrence of all the Trustees is required. Village Councils have this power to two-thirds of the cases where the power to improve and assess exists, is it not reasonable to presume the expense will follow? And where the causes for improvement are the greater in number, and unlimited as to power, there will be the greater expense. At least, generally, "that's the way the money pose."

We all have to go to the Captain's office annually on the 20th day of December and June; and anticipating the settling days, I have looked into village matters on the Anditor's books.

Now let us see what the taxation will
probably be for corporation purposes in the
proposed village of Home City, if the village
is created with the boundaries as asked for
in the petition. To arrive at a fair estimate
the tax valuation or amount of the duplicate must be ascertained. The County

Now, is that a sufficient basis of valuation from which to support a full-blown village? The taxation in the Delhi special school district, (No. 6, Delhi Township.) composed of the town plats above named, with Delhi town plats above named, with Delhi town plats above named, with Delhi town plats at the property added, is \$450,690, and the taxation for the support of schools alone, for the year 1878, is 5.01 mills on the dollar of the year 1878, is 5.01 mills on the dollar of the year 1878, is 5.01 mills on the dollar? Certainly not for less than the average in the county, which is 5.00 mills on the average assessment of \$660,632 to each of the twenty village corporations in the county. If Home City is established as a village it will have the lowest tax valuation of any one of the then twenty-one villages, except Loveland. TAX PAYER. A Child Fascinating Birds in Ohio.

We learn from a correspondent that here resides in the vicinity of Harrisburg, in an out-of-the-way place in Hancock County, about three miles west of Mt. Blanchard, a very remarkable child, only five years old, who seems to have the power to charm birds at will. [Forest Review.] Her mother first noticed this strange

fascination that the child possesses about a year ago. The little girl was playing in the door-yard among a bevy of snow-birds, and when she spoke to them they would come and light upon her, twittering with glee. On taking them in her hands and stroking them, the birds, instead of trying to get away from their fair captive, seemed to be highly pleased, and when let loose would fly away a short distance and immediately return to the child again. She took several of them into the house to show her mother, who thinking the child might hurt them, put hem out of doors; but no sooner was the door opened than the birds flew into the room again, and lit upon the girl's head

and began to chirp.

The birds remained about the premises all winter, flying to the little girl whenever the door was opened. The parents of the little child became alarmed, believing that this strange power was an ill omen, and that the much-dreaded visitor, death, was about to visit their house But death did not come, and during last summer the child had numerous pets

from the birds. The child handles the birds so gently that a humming-bird once in her hand does not fail to return. This winter a Incid and logical manner.

The old engineer at Jacob H. Long's printing-works came near meeting with a faul accident Wednesday evening. While working about the machinery his coat aleeve caught on the piston-rod and the belt. It began twisting his clothing about in a very uncomfortable manner, when he was released from his perilous position by employes of the office.

Wrenched and Rucked

By the panes of rheumatism, the joint eventually become grievously distorted and sometimes assume an almost grotesque deformity. To prevent such results by a simple and agreeable means is certainly the part of wisdom. A tendency to rheumatic attents may be successfully combatted with Hosietter's Stomach Bitters, a medicine with the prestige of a long and successful career, of unbounded popularity, and of emphatic professional inforsement. It removes from the blood those inflammatory impurities which pathologists assign as the cause of rheumatism, and not only putifies the life current, but enriches it, promoting vigor by ferillizing its source. Digestion, the action of the lowels and the secretion of the bile, are aided by it, and it impels the kidneys and bladder to a regular and active performance of their functions. It is besides a thoroughly reliable remedy and sometimes assume an alm
